

GLE SCRAP METAL

855-SCRAP-88

GLE Scrap Metal performs environmentally-friendly processing and recycling of all base and precious metals. Our core policies help to utilize natural resources and conserve energy.

Who We Are

GLE Scrap Metal performs environmentally friendly processing and recycling of all base and precious metals. Our core policies help to utilize natural resources and conserve energy. We are Michigan and Florida's premier scrap metal and electronic recycler and supply domestic mills and global end-users with a wide range of raw commodities that are transformed into new products. We purchase, collect, process and resell millions of pounds of non-ferrous metal, ferrous metal and electronic equipment annually.

GLE Scrap Metal is a fully licensed and insured scrap metal processor and recycler. We have retail centers purchasing from the general public, a fleet of vehicles and containers servicing industrial clients, and material handling and processing equipment to service other metal recycling companies. Our knowledgeable and experienced staff can help your business to economically maximize the value of your excess materials in a safe, efficient, and environmentally friendly fashion.

Services Offered

Logistics & Transportation

We take pride in our commitment to safe, efficient, and prompt DOT compliant transportation services. GLE Scrap Metal operates its own fleet of trucks with class A CDL drivers that are courteous and professional. Our trucks will pickup material from your facility on time, every time. Our Logistics coordinator will call to confirm pickups and advise our customers when our trucks are dispatched. Our fleet is licensed and insured by A-rated carriers and consists of semi-trucks, flatbeds, roll-offs, and box trucks with lift gates; all of which are inspected daily by our in house maintenance staff. We have established relationships with independent carriers or our customers can arrange to deliver their recyclables to any one of our locations; whichever is found to be most cost effective and convenient for our customers. Our thorough and knowledgeable logistics department will make recycling easy for your business.

Brokerage & Trading

GLE Scrap Metal will purchase and transport large quantities of commodities from recycling facilities across the United States and sell these commodities to end-users. We offer prompt payment, competitive pricing and excellent service for quality products. We handle everything from CCIC inspections to port delivery and container release. We supply large volumes of non-ferrous materials to domestic mills and foreign end-users. Our established long-term relationships allow us to purchase commodities for top dollar. Our success depends on the quality of our customers.

Ferrous Processing

GLE scrap metal purchases all grades of ferrous materials. We provide state certified scales and advanced computer systems ensuring proper grading and accurate weighing of your material. Our experienced staff monitors market conditions to ensure fair payment for your various grades of ferrous scrap. We buy nearly everything with metal content, but please see our Ferrous Criteria section for more details.

Non-Ferrous Processing

Non-ferrous scrap is a primary component of our business. We specialize in buying, processing and selling non-ferrous metals. We have a comprehensive range of services to meet the needs of all customers. Our experienced and dedicated staff can assist businesses and individuals with metallurgical analysis, proper scrap handling and storage.

Electronics Recycling

GLE Scrap Metal partners with our sister company Great Lakes Electronics to perform environmentally friendly recycling. Components of value are sent to certified facilities for metals recovery. All items from the de-manufacturing process are recycled, including items with no value which may be recycled at our expense.

Environmental Compliance

Institute of
Scrap Recycling
Industries, Inc.

Striving to be the best in our industry, GLE Scrap Metal is continually training its staff on environmental procedures. We follow the guidelines of Occupational Safety and Health Administration (OSHA) and Institute of Scrap Metal Recyclers (ISRI) in every operation. The International Organization for standardization now certifies our Detroit Facility (ISO 14001:2004).

A Full Service Scrap Recycling Company

Material Recycled

Ferrous Metals

- Appliances (no Freon bearing)
- Sheet Iron
- Cast Iron
- Bushling
- Steel Chips, Shaving, or Turnings
- Motor Blocks
- Rotors
- HMS
- Unprepared Iron
- Rebar

Electronics

- PC / Workstation / Laptop
- CRT / LCD Monitor / Terminal
- Printer / Copier / Fax / Scanner
- Server / Storage / Mainframe
- Networking / Telecom
- UPS / Battery back-ups
- Point of Sale

Non-Ferrous Metals

- Copper
- Aluminum Copper Coils
- Brass
- Lead
- Diecast
- Aluminum
- Stainless Steel
- Cans
- Transformers
- Electric Motors
- Aluminum Shavings
- Insulated Aluminum
- Radiators
- Alloys
- Water Meters
- Insulated Wire
- Figure 8 Cable
- Heater Cores
- Wheels
- Electric Meters
- Batteries
